County

MIRAA (KHAT) ADDICTION TREATMENT PLAN

MONTH 1: DETOXIFICATION, WITHDRAWAL MANAGEMENT & STABILIZATION

- **Intake & Diagnostic Screening:** Comprehensive toxicological screening and physical evaluation to establish baseline health parameters and assess the severity of psychological stimulant dependence.
- **Psychiatrist Evaluation:** Initial comprehensive clinical assessment specifically profiling for common co-occurring stimulant-induced issues like Khat-Induced Psychosis, severe paranoia, clinical depression, and clinical anxiety.
- **Clinical Withdrawal Support:** Structured 5-day observation and support phase monitoring autonomic baselines and addressing severe physical lethargy, sleep cycle inversion, and intense psychological cravings.
- **Medication Management:** Administration of necessary non-addictive pharmacological agents targeting acute depressive crashes, extreme irritability, insomnia, or secondary transient psychotic symptoms to achieve neurochemical stability.

MONTH 2: REHABILITATION & INTENSIVE PSYCHOTHERAPY

- **Evidence-Based Psychotherapy:** Structured therapeutic tracks integrating Cognitive Behavioral Therapy (CBT) to modify stimulant-seeking triggers, Motivational Interviewing (MI) to build intrinsic resolve, and deep Cognitive Restructuring.
- **Targeted Psychoeducation:** Interactive workshops exploring the cardiotoxic and psychological long-term dangers of active Cathinone consumption and its disruptive relationship with mental wellness.
- **Counseling Ecosystem & Group Processes:** Consistent delivery of individual counseling tracks, supportive group process therapy sessions, and initial restorative family intervention cycles.
- **Life Skills & Lifestyle Redesign:** Dedicated coaching centered on structuring daily tasks, reversing chronic sleep deprivation, managing financial leaks, and breaking long-standing socio-environmental chewing habits.
- **Recovery Coaching:** Integration of behavioral frameworks and peer mentoring purposefully tailored to conquer systemic self-defeating loops and actively restore healthy self-esteem.
- **Ongoing Psychiatric Review:** Routine monthly psychiatric evaluations tracking mental state improvements, stabilizing post-acute crashes, and managing clinical pharmacological support parameters.

MONTH 3: ADVANCED RELAPSE PREVENTION & TRANSITION PLANNING

- **Relapse Prevention Training (RPT):** Formulating highly targeted, localized safety mapping. Identifying specific high-risk chewing environments or social triggers and conditioning practical refusal assertiveness patterns.
- **Intense Systemic Family Therapy:** Advanced family counseling loops focusing on breaking relational enabling cycles, managing expectations, and re-establishing an accountable home support framework.
- **Discharge Matrix & Aftercare Framework:** Constructing a formal discharge execution plan, setting up continuing outpatient psychological check-ins, and coordinating handoffs to local sober support spaces.
- **Final Psychiatrist Clearance Evaluation:** Concluding psychiatric evaluation certifying absolute behavioral stability, lifestyle transition readiness, and authorizing formal discharge release.
